

Solar Power

"Smart Energy"

“Be a proud contributor of saving our planet and it’s environment”

About us

Solar Power believes in creating a clean energy environment for the world by aiding in reducing the carbon footprint through providing renewable energy. **Solar Power** is a wholesale/retail provider of complete solar energy systems with top rated solar panels and high quality inverters.

We provide systems materials:

- Solar PV Modules
- Invertors
- Bracket for Installation

All Solar components are **UL** Certified and Listed

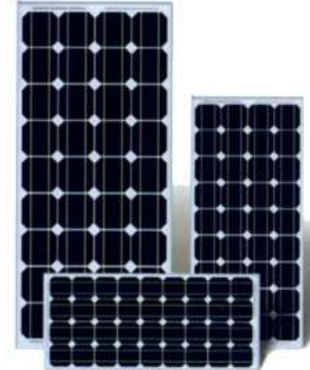

Residential

Commercial

Competitive High Quality Modules

- ◆ In order to ensure and provide the most competitive pricing, **Solar Power** designs, creates and produces high quality modules through its first class vertically intergraded manufacturing partners.
- ◆ **Solar Power** brand is a unique combination of high quality and technology expertise.

Financial Solutions

Along with our financial partners we can offer you a wide variety of financing solutions for your installation needs. Financing is critical when finalizing a deal and we want our customers to be worry free.

Solar modules are designed to withstand harsh environments and extreme operating conditions. All models are tested to ensure continuous performance. Due to our massive production capacity, **Solar Power** is able to provide the most reliable product line to our global customers in large volume.

Product Manufacturing

- ◆ Industry's widest power output selection (0.03W—300W)
- ◆ BIPV products and customized solutions
- ◆ Certified according to **UL**, IEC, CE, TUV
- ◆ Industry leading 25 year performance warranty

How Does Solar Power Work?

- With a solar kit from **Solar Power**, you can reduce or eliminate your electricity bill. While you pay less every month to the utility company, you'll be helping to reduce greenhouse gas emissions from power plants fired with fossil fuels. It is the right solution for the next generation.
- With all the incentives that will arise from this alternative, now is the time to go solar and **Solar Power** can help you get there.

Built to Last

Solar modules are designed to withstand harsh environments and extreme operating conditions. All models are tested to ensure continuous performance. Due to our massive production capacity, **Solar Power** is able to provide the most reliable product line to our global customers in large volume.
